

# Sigma is Your Single Source for Health Care Indoor Air Quality Services

## HEALTH CARE FACILITIES

Sigma provides full service IAQ and water monitoring for health care facilities. Sigma provides a full array of monitoring services during normal facility operations, renovation and demolition projects.

- ▶ Particulate matter, including USP <797> pharmacy monitoring
- ▶ Infection control-related airborne biological investigations (fungal and bacterial)
- ▶ Water biological monitoring (*Legionella*, Mycobacteria)
- ▶ Temperature
- ▶ Relative humidity
- ▶ Carbon dioxide
- ▶ Carbon monoxide
- ▶ Environmental tobacco smoke
- ▶ Other process chemical exposure monitoring services
- ▶ Moisture assessments

### Sigma helps you maintain a clean environment

Sigma provides you with critical information to help you maintain a clean health care environment.

### Sigma provides reliable information

Sigma provides IAQ services to help you maintain your facility's compliance and keep your patients safe.

## RENOVATION AND DEMOLITION SERVICES

During renovation and demolition projects, Sigma participates in infection control risk assessment (ICRA) activities, provides dust management control recommendations, and evaluates dust containment barrier construction and effectiveness. Monitoring data and observations are communicated via summary reports tailored to client-driven needs

### Common causes of IAQ issues:

- Indoor pollution sources
- Inadequate ventilation
- High temperature
- High humidity levels
- Ineffective dust control
- Water intrusion
