

Sigma is your Single Source for LEED® Certification

ACHIEVE LEED® CERTIFICATION

Sigma's team of experienced professionals has assisted clients in producing sustainable residential, commercial and industrial developments in many ways including proper demolition, planning for reuse and recycling, brownfield redevelopment, site design, owner's representative services, building assessment and commissioning services, and environmental quality related services.

By getting involved in the process from the very start, Sigma maximizes LEED® points and saves our clients money through improved efficiencies and smart design.

Reduce your footprint while saving money.

Sigma will help you get the most out of your green development.

LEED® SERVICES

Sigma's staff can help you attain your LEED® point credit goals in the following areas:

- ▶ Sustainable Sites
- ▶ Water Efficiency
- ▶ Energy & Atmosphere
- ▶ Materials & Resources
- ▶ Indoor Environment Quality
- ▶ Innovation & Design Process

Let us help you commission your new or renovated building systems.

Greening: What are the benefits?

- **8-9 percent** decrease in operating costs
- **7.5 percent** increase in building values
- **6.6 percent** improvement in return on investment
- **3.5 percent** increase in building occupancy
- **3 percent** rent increase
